The Creeping Garden
2014, Blu-ray, 82 minutes

A documentary directed by Tim Grabham and Jasper Sharp

Monday, September 28, 2015, 7pm
Luce Hall Auditorium
Yale University, 34 Hillhouse Ave., New Haven

featuring a discussion with director Jasper Sharp

A real life science fiction movie exploring a world creeping right beneath our feet, where time and space are magnified and intelligence redefined. The Creeping Garden is a multi award winning feature length creative documentary exploring the work of fringe scientists, mycologists and artists, and their relationship with the extraordinary plasmodial slime mould. The slime mould is being used to explore biological-inspired design, emergence theory, unconventional computing and robot controllers, much of which borders on the world of science fiction.

Co-directed by artist film-maker Tim Grabham and writer and film curator Jasper Sharp, and with an original soundtrack composed by celebrated musician and producer Jim O’Rourke (Sonic Youth, Werner Herzog’s Grizzly Man), this is a unique exploration into a hitherto untapped subject matter, observing and immersing the audience into the worlds of the observers and the observed.

“An improbably delightful documentary.... Full of trippy visuals”
Dennis Harvey, Variety

Screened with assistance from the Film and Media Studies Program
